

Raden Achmad Bobby Syakir

Jakarta, Indonesia | bobbysyakir18@gmail.com | +62 896 71796 434 | [Linkedin](#)

Experienced Software Engineer with 1+ year of experience in designing and developing full-stack web applications. Proficient in modern JavaScript technologies and experienced in building scalable, maintainable systems. Strong collaborator in cross-functional teams, with a passion for continuous learning, problem-solving, and delivering impactful digital solutions.

Professional Experience

Ragdalion Technology / *lot and data cloud manufacturing, embrace the future with lot* Indonesia
Software Engineer, Frontend Aug 2025 – Now

- Developed a large-scale **Halal Certification Digitalization Platform (LPPOM)** consisting of **11 integrated modules**, covering end-to-end certification workflows.
- Implemented **authentication, role-based permissions, guarded routes**, and secure access control across the system.
- Built core business modules including **Employee Management, OSS (Accommodation, Ticketing, Scheduling), QOM (Finance), BMS (Invoicing), and LMS (Learning Management System)**.
- Developed a **real-time chat feature** to support internal communication and coordination
- Designed and developed a **Web-based API Documentation UI** to support internal and external system integrations.
- Collaborated closely with backend, QA, and business stakeholders to ensure scalable architecture, consistent data flow, and maintainable frontend structure.

Tech Stacks: React.js, TypeScript, REST API, Zustand, Context, Web Socket, Modular Frontend Architecture

Hacktiv 8 Indonesia / *Hacktiv8, Asia's first bootcamp, is registered with the Council on Integrity in Results Reporting.*
Join as Student Software Engineer, Full stack December 2024 – April 2025

Completed an intensive Full Stack JavaScript bootcamp focused on building end-to-end web applications. Developed responsive frontends, scalable backends, REST & real-time APIs, implemented authentication, database design, and deployed applications in team-based projects.

Tech Stacks: JavaScript, React, Next.js, Node.js, Express, Socket.IO, PostgreSQL, MongoDB, Sequelize, JWT, Git

Projects & Achievements

Halal Certification Digitalization (LPPOM Indonesia)
Frontend engineer for a large-scale halal certification system. Built and integrated core modules (ticketing, scheduling, transactions, complaints, overtime), developed reusable components, implemented route guards and role-based access, designed key UI features, integrated real-time chat and notifications, and created internal API documentation portals.

Real-Time Quiz Platform
Developed the frontend of a live quiz application with real-time rooms, questions, timers, scores, and leaderboards. Integrated Socket.IO for synchronized gameplay and dynamic ranking updates.

E-Commerce Platform (Belibesar & Others)
Full-stack developer for multiple e-commerce platforms, including **Belibesar**, a group-buying marketplace. Implemented payment gateways, cloud services, real-time notifications, cron jobs, and designed major frontend features for scalable user experiences.

Crowdsourced Urban Problem Solver
Full-stack developer building a community platform for reporting and voting on urban issues. Designed system architecture, routing, middleware, real-time interactions, and responsive, user-friendly interfaces. *(Ongoing project).*
